Information to staff and coworkers at the Institute of Neuroscience and Physiology.

New start page for the Institute’s website

The new start page for our website is published today. The Institute’s web coordinator, Josefin Bergenholtz, has developed a new structure for the web pages in dialogue with the direction of the Institute. The work on the English webpages is in progress, although much work remains.

The start page and pages in the top-level menu shall give concise and general information about the Institute of Neuroscience and Physiology. They shall also facilitate navigation to detailed information on research, education and personnel on the departments’ web pages.

At the start page, there is an entrance to the “internal” pages; these are for staff and coworkers only. The target group for our external website is primarily our external visitors. Therefore, the news at the start page will not contain internal information any longer.

To the Institute’s website.

The Institute Day 2016

The Institute Day 2016 took place on January 28. This year we celebrated the Institute’s 10th anniversary.

The afternoon began with the traditional welcome speech held by the Head of the Institute, Professor Agneta Holmång. This year’s guest lecture was held by Professor Gunnar Steineck, professor in oncology at the Institute of Clinical Sciences. Professor Steineck’s lecture was
followed by lectures held by the Institute’s newly appointed professors.

Program in English – The Institute Day 2016

The lectures during the afternoon were followed by a welcome drink for the dinner guests. The dinner for the 125 guests was served in room Birgit Thilander. Host for the dinner this year was the Department of Health and Rehabilitation.

During the evening the guests were served a tasty menu and entertaining speeches about the Institute’s first 10 years and our upcoming Nobel Prize... The group "Grace" entertained us with song, music and surprises.

If you would like to see pictures from the Institute’s Day 2016, there are more pictures published at our website.

**Newsletter**

Our aim is to regularly publish a newsletter with internal information and news. More information about the newsletter will follow.
