Call for the Wallenberg Clinical Fellows

Marianne and Marcus Wallenberg Foundation is launching a research program to stimulate clinical research as well as for identifying future research leaders in a clinical setting.

The applicant applies directly through the foundation's website. The application deadline is 27 May, 2016. Further information and application to Wallenberg Clinical Fellows can be found at the Wallenberg Foundations website (in Swedish).

The Department of Clinical Neuroscience and Rehabilitation changes name

On May 1, the Department of Clinical Neuroscience and Rehabilitation will change name to the Department of Clinical Neuroscience.

This decision was taken (Reg.no V 2016/328) March 31, 2016 by the Head of Department, Kristina Malmgren.

The Administrative prize at the University to the Department of Physiology

The developers of a new digital system which facilitates the distribution of student exams among examiners (DART) won this year’s administrative prize.

Picture to the right: The developers of DART, Jennie Toppari and Camilla Torstensson at the Institute of Neuroscience and Physiology, Department of Physiology.

More information about the administrative prize can be found at the Gothenburg University’s website (in Swedish).
Request for the establishment of project-linked doctoral projects

All Institutes at the Sahlgrenska Academy are invited to establish doctoral projects for the next announcement of project-linked positions for doctoral students. The application documents from the project supervisors must have reached the Institute no later than May 4, 2016.

NOTE - New application procedure. To facilitate the handling process and to save the environment, we introduce a partially electronic application process for this application round.

More information and application form for the establishment of project-linked doctoral projects at the Sahlgrenska Academy website.

Swedish Society for Medical Research (SSMF) announces support to younger researcher

SSMF is a foundation, who with the help of donations is working to support medical research.

Swedish Society for Medical Research announces support to younger researcher to establish their own research. Last day of application: May 15.

To the Swedish Society for Medical Research’s website for information about the application procedure for this call.

Nomination to the Hasselblad Foundation’s call for continued research qualifications for woman 2016

General prerequisites, rules and regulations concerning funding for continued research qualifications for woman with PhDs in natural sciences please see the Institute of Neuroscience and Physiology’s website.

The Head of Institute, Agneta Holmäng, must have your application no later than May 6.

For further information about the Hasselblad foundation, please see the Foundation’s website.

Costs for late and missed out appointments at Previa

Late and missed out appointments at Previa will be billed directly to the Faculties and to the Central administration. Cancellations must be made no later than 24 hours before the visit.

Register publications for 2015 in GUP

Compilation of data as basis for research funding The University of Gothenburg allocates parts of its research funding based on external funds and publications. The publications database GUP forms the basis of the information on publications. In order to be included in the compilation of data for next budget year all publications published in 2015 must be registered in GUP no later than Sunday May 1, 2016.

For any questions please contact GUP support: gup@ub.gu.se or 031-786 66 71.
Apply for courses at third-cycle level autumn semester 2016

The course catalogue for courses at third-cycle level autumn semester 2016 is published on the Gothenburg University’s website. Detailed information about the application process is available on the front page of the course catalogue. The course catalogue is open for applications 1 - 21 April 2016.

Please save the date May 17th approx. 10.00 – 12.00 h for Young Scientists Day in lecture room Arvid Carlsson

The Council for Research wants to give credit to successful younger scientists at the Sahlgrenska Academy that have received their first grant in national/international competition.

All of the presenters have been awarded grants in national competition, and we also have the Swedish Fernström Prize Winner from Gothenburg as a speaker.

Come and listen to our talented young scientists that will present their winning concepts; how to write a successful grant application. It is an opportunity to meet talented young researchers and to learn more about their research.

Newsletter

Our aim is to regularly publish a newsletter with internal information and news instead of sending several messages by email.
