Postgraduate education

PhD courses autumn term 2017

The committee for PhD education (Forskarutbildningskommittén, FUK) would like to get suggestions for courses at third-cycle level to be given the autumn term 2017.

If you would like to give a course the autumn term 2017, please contact your FUK-member to discuss how your course could fit the overall program at the Institute. Thereafter, it can be registered in the course database. Please observe that the planned courses must be registered in the database by November 21, 2016. For more information – suggestions for courses at third-cycle level

Request for the establishment of project-linked doctoral projects

All Institutes at the Sahlgrenska Academy are invited to establish doctoral projects for the next announcement of project-linked positions for doctoral students. The application documents from the project supervisors must have reached the Institute no later than November 9, 2016. When the Institutes have decided which projects are approved, a list of these and application documents must have reached the Academy Office no later than November 23, 2016.

More information and application form

Information from NEURO-IT

Migration of e-mail accounts

The process of migrating the e-mail accounts at the Institute is on-going. However, the permanent move of the email-accounts is delayed. A number of actions and preparations are now being worked on, in order to ensure that the migration can be carried out as smoothly as possible. We will have to wait an extra couple of weeks for the permanent migration to be carried out (as for now, it is difficult to schedule an exact date). You will receive more information and instructions in advance of the migration.
Conferences – Lectures – Seminars

Patologiskt samlande och dysmorfofobi

Tuesday October 25 2016
Sahlgrenska Psychiatry Lecture
Lecturer: Christian Rück, universitetslektor och överläkare, Karolinska Institutet, Stockholm
