Personal report system will be replaced

The current personal report system (Palasso) will be closed down on Monday 6th of February and replaced by Primula. During the period 6th of February – 6th of March, all data will be moved between the systems and no new registrations can be made during this period.

As a consequence, it is important that all events (such as sick leave, vacation, parental leave, travel expenses etc.) are reported and attested on Monday 6th of February, at the latest.

During the period 6th of February – 6th of March all employees have to take notes on events and then report them in the new system when it opens.

The Human Resources Unit will send further information by e-mail to all employees regarding support, links to Primula and instructions for the new system. Read more: PA 2.0 - nya system och arbetssätt inom personaladministrationen >>>

Institute Day, 26 of January

A few seats still available for the dinner. Deadline for registration to the dinner is tomorrow, January 18th. The dinner is free of charge.
