Request for the establishment of project-linked doctoral projects

All institutes at the Sahlgrenska Academy are invited to establish doctoral projects for the next announcement of project-linked positions for doctoral students. The application documents from the project supervisors must have reached the institute no later than November 8, 2017. More information and application form: 

[Request for the establishment of project-linked doctoral projects]

Honorary Doctors of Sahlgrenska Academy 2017

19 October 2017.

Programme - Honorary Doctors of Sahlgrenska Academy 2017 >>>

Lunch seminar - Centre for Psychiatry

24 October 2017, 12-13

Michael Schöll: "Att se neurodegenerativa sjukdomar - positronemissionstomografi i demensforskningen" >>>
The lecture will be held in Swedish

Defence of doctoral thesis

23 October 2017

Modh Yusmaidie Aziz - Piperaquine and metabolites >>>

27 October 2017

Anna-Kari Sjödin - Offenders of intimate partner violence: Aggressive antisocial behavior and mental health >>>

Institute Day 2018

1 February 2018 – The Institute Day 2018 - SAVE THE DATE!

Building plans at Medicinareberget

Do you have questions concerning the building plans at Medicinareberget?

E-mail: medicinareberget@gu.se

The Department of Communication at the Sahlgrenska Academy will receive your queries and make sure they will be answered.

Information (in Swedish):

Byggnationer på Medicinareberget >>>

Printing service – GUprint will be implemented

During autumn/winter 2017 the printing service GUprint will be implemented at the institute. The service allows you to print, copy and scan from any printer connected to the system. You can pick up your prints from any printer using your GU card. The Departments will be noticed in advance of the change. For further information, contact NEURO-IT.

Grants from Lundbergsstiftelsen

Lisa Buvall and Ann Hellström are two out of ten researchers at the Sahlgrenska Academy who have received large grants from IngaBritt och Arne Lundbergs Forskningsstiftelse.

Lisa Buvall, Department of Physiology, has received 2 million SEK for the project "Reglering av RhoGTPase proteiner i njursjukdom".

Professor Ann Hellström, Department of Clinical Neuroscience, has received 1 million SEK for the project "Kroppssammanståtning hos prematurfödda barn – markör för framtida hälsa?".

"We have to admit gender differences when it comes to stroke"

Professor Katharina Stibrant Sunnerhagen (picture), Rehabilitation Medicine at the Department of Clinical Neuroscience, is one of the authors of the article Stroke in women — from evidence to inequalities, which was published in Nature Reviews in Neurology. Article (in Swedish): "We have to admit gender differences when it comes to stroke"

Elisabet Wentz has been appointed professor at the Sahlgrenska Academy

Treacherous correlation in the brain from smoking

Out with the cigarette pack, put a cigarette in the mouth and light up. That is a well-known action for a smoker and, at the same time, behavior which has a stronger connection to actual drug dependency than was previously believed, research at Sahlgrenska Academy has revealed.

“In the future we hope that this can contribute towards the development of pharmacological tools to help those who are dependent,” says Amir Lotfi Moghaddam, thesis defendant in addiction biology at the Institute of Neuroscience and Physiology.
